

AUSLAN OVERVIEW TERM 1

Violeta Young
Auslan Teacher

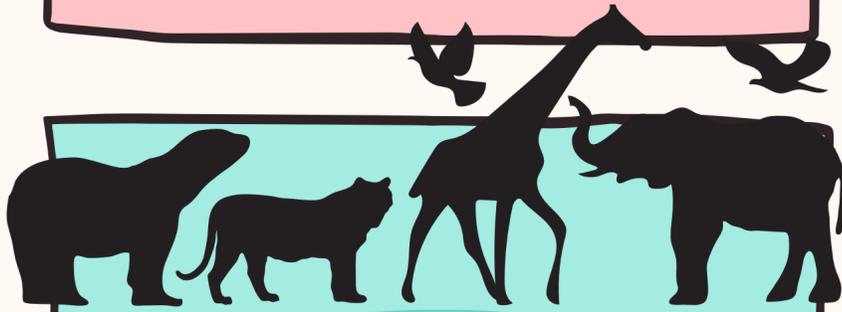

Welcome to Auslan 2026!
I'm excited to share my love for Auslan with you!

Auslan is Australian Sign Language, a visual language used by many Deaf Australians to communicate using hand signs, facial expressions, and body movements.

Students will revisit their understanding of colour signs in Auslan so they can describe their world, follow instructions, and communicate clearly in a visual language.

Through hands on activities, students will apply their animal vocabulary knowledge in a fun and engaging way.

You can support your child's Auslan learning at home by practising signs together and exploring Auslan videos to reinforce their skills.

Students will learn and practise numbers in Auslan so they can confidently communicate amounts, dates, and everyday information.
